High performance Hydraulic Generators replace direct drive systems

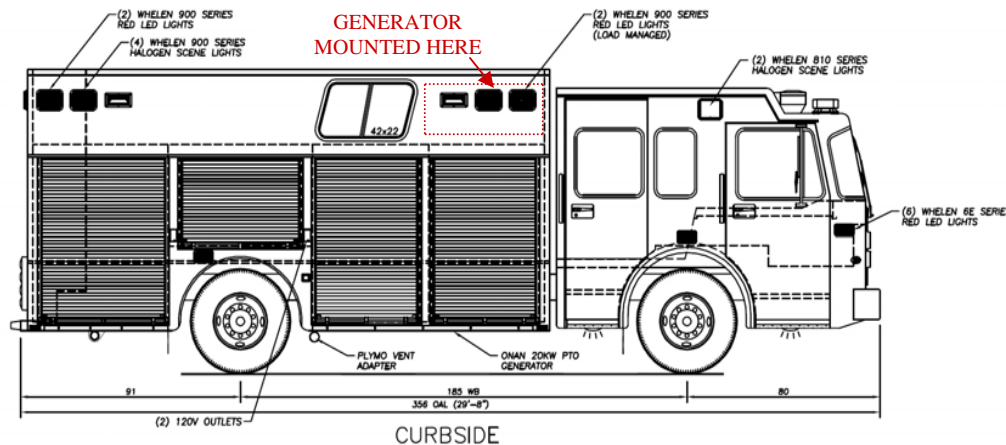

Detroit squad vehicle

Side-body, fresh air intake

Top, hot air exhaust (through walking grate)

Benefits

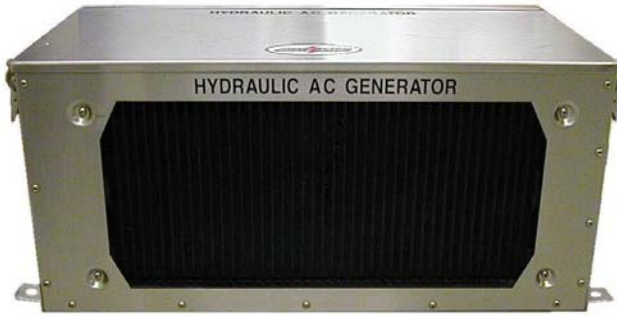

- Produces electrical power at all engine speeds
- Locates generator in protected environment
- No corrosion or failures from road spray
- High-reliability system
- Installs in low value, non-compartment space
- Limited maintenance
- Total electronic* control
- Power on-the-go

Generators available in 6.2, 8, 10, 15, 20, 25 and 30kW models

*patented

Retrofit Program

Hydraulic generator field replacement

**Trade in your old generator
and get up to \$3500
toward a *new*
Smart Power[®]
high performance
hydraulic system**

smart power[®] retrofit benefits ...

Immediate replacement

- Smart Power has your replacement unit on the shelf, ready to ship

Freedom of choice

- All Smart Power models (6.2-30kW) available — no constraints

Lower cost

- Trade in allowance of up to \$3500 provides a cost effective solution for upgrading or replacing your current generator system

Compact size

- Smart Power systems are 30% smaller than any other hydraulic system

Higher reliability

- Replace your old, unreliable, underpowered generator with a brand new high performance electronic controlled* Smart Power hydraulic system

Upgraded performance

- Smart Power electronically controlled* hydraulic generators provide clean power, 50% more cooling capacity, and built in diagnostic protection

More power

- Increase your power output capability by trading in your smaller system toward a new larger Smart Power system

Strong warranty

- Retrofit system has a 2 year, 1000 hour warranty. An additional 3 years of extended warranty can be purchased at time of sale.
